ELSEVIER Journal of Microbiological Methods 21 (1995) 333–335

JOURNAL OF MICROBIOLOGICAL METHODS

Contents of Volume 21

No. 1, January 1995

Review Article

Physiological assessment of bacteria using fluorochromes
G.A. McFeters, F.P. Yu, B.H. Pyle, P.S. Stewart (USA) 1

Research Papers

Disinfection tests with intact biofilms: combined use of the Modified Robbins Device with impedance detection
M.D. Johnston, M.V. Jones (UK) 15

Eubacterial PCR: contaminating DNA in primer preparations and its elimination by UV light
D. Goldenberger, M. Altwegg (Switzerland) 27

Computer program to evaluate the accuracy and the precision of micropipettes
G. Ozanne (Canada) 33

Effects of fixative and buffer on morphology and ultrastructure of a freshwater planctomycete, *Gemmata obscuriglobus*
M.R. Lindsay, R.I. Webb, H.M. Hosmer, J.A. Fuerst (Australia) 45

An efficient method for preparation of extracts from Gram-positive bacteria for comparison of cellular protein patterns
P. Kämpfer (Germany) 55

A novel rapid procedure for the isolation of outer membrane proteins from *Campylobacter jejuni*
O.M.J. Flynn, I.S. Blair, D.A. McDowell (UK) 61

Detection of gene expression in enterotoxigenic *Escherichia coli* by hybridization of RNA with a digoxigenin-labelled DNA probe
A. Jolivet-Gougeon, Z. Tamanai-Shacoori, M. Cormier (France) 67

A miniaturized method for freeze-drying of microorganisms in glass capillary tubes
K.A. Malik (FRG) 75

An electrochemical method for assessing biodeposition on stainless steel
L. Boulangé-Petermann, M.-N. Bellon-Fontaine, B. Baroux (France) 83

An improved method for the transformation of *Lactobacillus* strains using electroporation
M.-Q. Wei, C.M. Rush, J.M. Norman, L.M. Hafner, R.J. Epping, P. Timms (Australia) 97

Erratum 111

No. 2, February 1995

A method utilizing mycelial fragments to estimate the relative biomass densities of fungal species in mixed culture
J.L. Cheetham, M.J. Bazin, P. Markham, J.M. Lynch (UK) 113

Transferring data and measuring programs with KERMIT between PC type computers, GILFORD SYSTEM 2600 spectrophotometers and other scientific instruments
K.-D. Jahnke (Germany) 123

IDENTIFY–a menu-driven computer program compatible with MICRO-IS 5.0 for the probabilistic identification of bacteria
K.-D. Jahnke (Germany) 133

Quantification of pathogenic marine vibrio using membrane filter technique
J. Hernández-López, M.A. Guzmán-Murillo, F. Vargas-Albores (México) 143

Comparison of methods for isolation of *Mycobacterium avium* complex DNA for use in PCR and RAPD fingerprinting
L.E. Via, J.O. Falkinham, III (USA) 151

Purification of the *Staphylococcus aureus* β haemolysin by a simple efficient method
C. Herbelin, B. Poutrel (France) 163

Construction of a transducible cassette encoding an inducible bacteriophage T7 RNA polymerase gene *1* in *Escherichia coli*
K. Tedin, U. Altanerova, U. Bläsi (Austria) 173

An enzyme-linked immunosorbent assay for measuring antibodies to serotype-specific polysaccharide antigens of *Actinobacillus actinomycetemcomitans*
M. Kawasaki, N. Takamatsu, T. Ansai, Y. Yamashita, T. Takehara, T. Koga (Japan) 181

The use of confocal scanning laser microscopy (CSLM) to study the germination of individual spores of *Bacillus cereus*
P.J. Coote, C.M.-P. Billon, S. Pennell, P.J. McClure, D.P. Ferdinando, M.B. Cole (UK) 193

Modified FALGPA assay for cell-associated collagenolytic activity
R.J. Jackson, M. Lien Dao, D.V. Lim (USA) 209

A modified method for extraction of low molecular weight (LMW) RNAs from thermophilic bacteria
M. Marchiani, M. Aragno (Switzerland) 217

No. 3, March 1995

Extraction and purification of PCR amplifiable DNA from lacustrine subsurface sediments
P.A. Vescio and S.A. Nierzwicki-Bauer (USA) 225

Strategies for phylogenetic characterization of subsurface bacteria
R.H. Reeves, J.Y. Reeves and D.L. Balkwill (USA) 235

Time-dependent changes in viable numbers and activities of aerobic heterotrophic bacteria in subsurface samples
J.K. Fredrickson, S.W. Li, F.J. Brockman, D.L. Haldeman, P.S. Amy and D.L. Balkwill (USA) 253

Screening tests for assessing the anaerobic biodegradation of pollutant chemicals in subsurface environments
J.M. Suflita and F. Concannon (USA) 267

Variability and density dependence of bacteria in terrestrial subsurface samples: implications for enumeration
T.O. Stevens and B.S. Holbert (USA) 283

Optimization of media for enumeration and isolation of aerobic heterotrophic bacteria from the deep terrestrial subsurface
T.O. Stevens (USA) 293

Comparison of drilling and mining as methods for obtaining microbiological samples from the deep subsurface
D.L. Haldeman, P.S. Amy, C.E. Russell and R. Jacobson (USA) 305

Development of a rapid ^{14}C-based field method for assessing potential biodegradation of organic compounds in soil and sediment samples
E.L. Madsen, S.E. Bilotta-Best and W.C. Ghiorse (USA) 317
